WE CALL IT GRIM.....

Grim. Dublame. Wackstep. Different people call it different things, depending on their age, haircut or shoe size. If you listen to the music we love the chances are you probably call it something different from us. Shite. Awful. Unlistenable. It's been the same through the 80s and 90s. We've called it so many different things that the journalists can't even be arsed to listen to it now, let alone pigeon-hole it. This is a good thing - it's music. Mongoloid, multi-mingmong music made by middle-class myrmidons with misshapen genitalia. Music that's great for hoovering to, perhaps while injecting PCP into your pancreas with a cake-icing pipe. It's instrumental dance music that's clearing the dancefloors across Croydon, Wolverhampton and King's Lynn. It's the perfect forum for anaemic doombrians with bad haircuts to create music that few people like, and then earnestly brag about their revolutionary genius. That's why we here at Werk Records are calling it Grim, to try and dress up another set of releases as a new musical movement, outside the specialist world of ourselves and our sad little circle of friends. And hopefully help us sell a few more records. Some people will say we're just zeitgeist chasing, trend-hopping, jumping on an imaginary genre and greedily trying to fill our boots with the rest of them. To those people, let us say this: we're going to ride that bandwagon all the way into town, whooping and cheering, with our trousers round our ankles and cans of Special Brew clutched to our breasts. Chances are you're already listening to Grim, trapped there in your tin-pot rave-den in suburbia. And by God, if you're still reading this drivel, you might just be the kind of person that creams his or her pants every time someone invents a new genre. Now is the time to change those pants, and the soundtrack is Grim.

THE GRIM DUBS

Say what? Two sided, twelve inch vinyl pipes, with complimentary music carved onto each façade, lovingly served on a bed of warm cardboard.

Say who? Various knackered old nags from the Werk stable.

Say when and where? Imminent. From your local independent record enthusiast, or online Interweb vinyl confectioners.
